DETAILED ACTION

Specification

The amendment filed September 3, 2002, is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a connecting device, a system comprising a percutaneous bone-anchored transferring device and a connecting device, and methods.

Applicant is required to cancel the new matter in the reply to this Office Action.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: With regard to Claim 15, there is no disclosure in the specification of a weakened zone.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 22-36 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the

Art Unit: 3763

application was filed, had possession of the claimed invention. The matter was found by the Examiner in the substitute specification submitted by Applicant on September 3, 2002.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "weakened zone" in claim 15 is a relative term which renders the claim indefinite. The term "weakened zone" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claims 22-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Examiner believes the percutaneous bone-anchored transferring device to be functional language. Applicant needs to more clearly define functional language if so be the case. For example, Applicant needs to use functional language such as "capable of use with..." or "being capable of use with..."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Ray (US 4,328,813). Ray discloses a percutaneous bone-anchored transferring device comprising an annular body member comprising a cavity, an interior surface, an exterior surface, an upper part and a bottom part, radial arms extending radially outward from the annular body member, and a lip in the interior surface of the upper part (Figures 1-4).

Allowable Subject Matter

If Applicant overcomes 35 U.S.C. 112, first paragraph rejections on new subject matter, Claims 22-36 are allowed over the prior art.

Response to Arguments

Applicant's arguments with respect to claims 13-36 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kathryn L Thompson whose telephone number is 703-305-3286. The examiner can normally be reached on 8:30 AM - 6:00 PM: 1st Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552.
